

Chestnut Drive & Buford Highway Intersection Realignment

The CID invested nearly \$30,000 in 2024 in preplanning efforts to improve connectivity and safety between Doraville's downtown redevelopment and the broader transportation network, including the Doraville MARTA station. To that end, the realignment will correct the intersection's skewed angle and add a signalized crossing, left turn lane, and upgraded pedestrian and street lighting.

Q4 2026 Update:
The Concept Report was approved by GDOT. The project is advancing to the next stage of design and a Public Information Open House (PIOH) is scheduled for November.
