

# Peachtree Blvd / Peachtree Rd / N. Shallowford Intersection Realignment

The CID is redesigning a complex 5-legged intersection at Peachtree Boulevard (SR-141) to improve traffic flow and safety along this growing regional corridor. Located just south of I-285, the project will accommodate increasing traffic volumes and support GDOT's future Express Lanes. The CID and city partners have secured three federal awards to date to advance the project.

## Q4 2026 Update:

The project will advance to 60% design this fall and is scheduled for completion in 2028. To carry the project through final design and right-of-way acquisition, the CID applied for \$1.3M in funding and committed a \$258K local match.
