CHAMBLEE DORAVILLE
COMMUNITY IMPROVEMENT DISTRICT

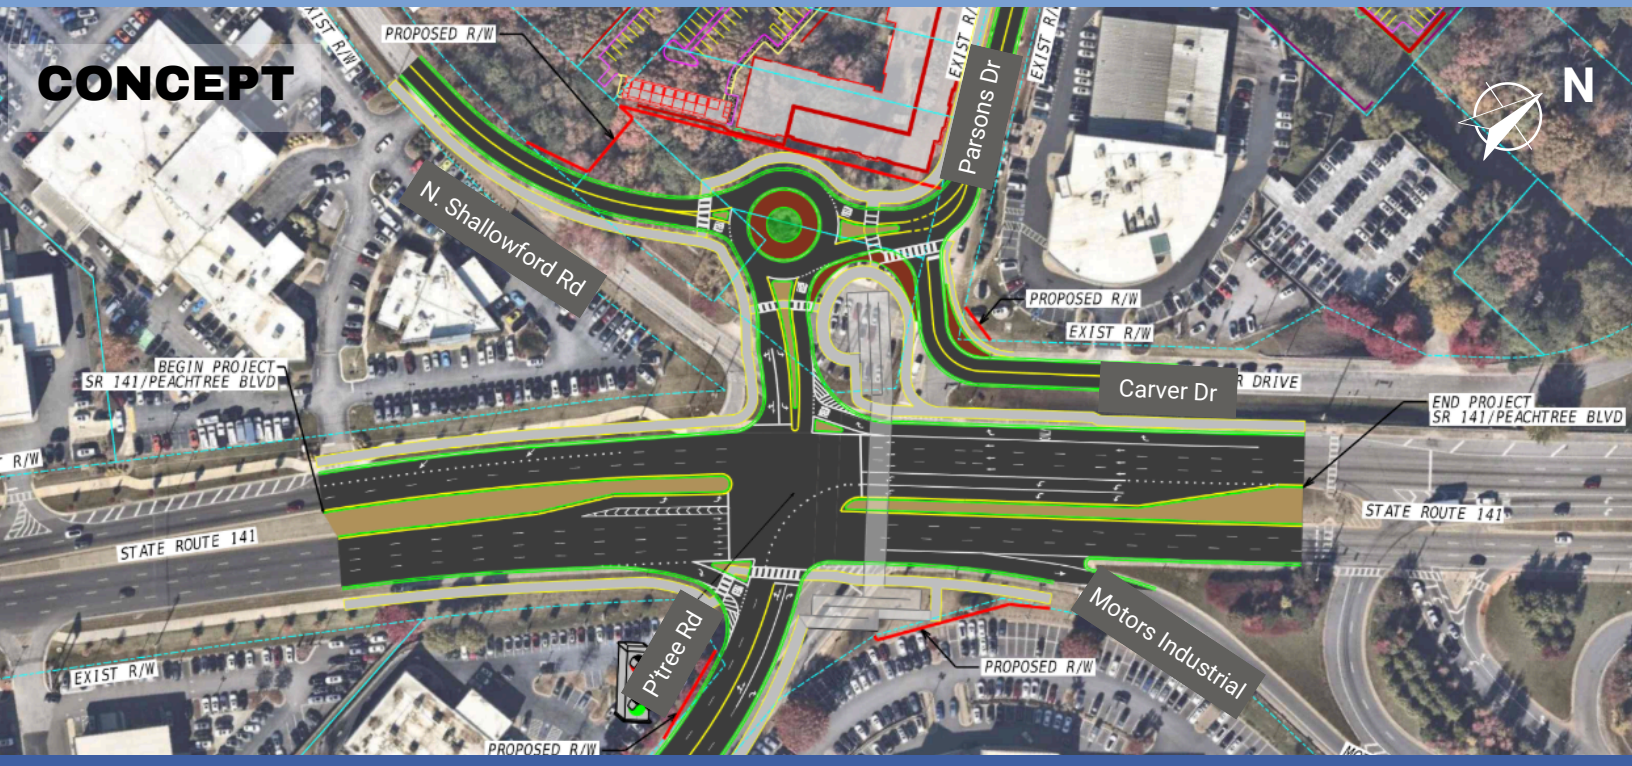

Peachtree Blvd / Peachtree Rd / N. Shallowford Intersection Realignment

The CID is redesigning a complex 5-legged intersection at Peachtree Boulevard (SR-141) to improve traffic flow and safety along this growing regional corridor. Just south of I-285, the project will accommodate growing traffic volumes and support GDOT's future Express Lanes. The CID and city partners have secured three federal awards to date to advance the project.

Q4 2026 Update:
The project will advance to 60% design this fall and is scheduled for completion in 2028. To carry the project through final design and right-of-way acquisition, the CID applied for $1.3M in funding and committed a $258K local match.

Total Project Cost: $22M
