

Top End Express Lanes

The CID is monitoring GDOT's regional express lanes expansion and coordinating with neighboring communities to advance high-capacity transit options within the system. As segments including the eastbound Top End lanes move toward construction, the CID is tracking the project's footprint and its long-term implications for the corridor.

Q4 2026 Update:

Responses to GDOT's Request for Proposals (RFP) for the first segment (Henderson Road to Northside Drive, including express lane connections to I-85 and GA 400) were due in June. A firm will be selected to deliver the project this fall.

GDOT / PPP

Total Project Cost: ~\$6B
