

Top End Transit

The CID is collaborating with neighboring communities to advance high-capacity transit along the Top End Express Lanes corridor. From 2018 to 2022, the Top End Transit Committee funded feasibility studies that secured a \$16.2M federal award, advancing the project to 20% design.

The resulting Station Area Analysis Report was submitted to MARTA in mid-2025 to inform the full Transit Study Report.

Q4 2026 Update:
The CDM Smith/MARTA team’s full Transit Study Report has been made public and is available under “resources” on the CID’s website.

Funding TBD

Total Project Cost: TBD
